

AMENDMENTS TO THE SPECIFICATION

Please amend the specification as follows:

On Page 2, following Paragraph [0023], please insert the following new paragraph:

Alternatively, the baffles of the fluid treatment device are arranged so that at least one baffle is adapted to direct flow of fluid such that about one-quarter of the fluid flows above a top of one UV source, one quarter of the fluid flows below the bottom of the UV source and half of the fluid flows between the UV sources.
